

Husqvarna MS 360

MS 360 is a masonry saw with a cutting depth of 5 inches. MS 360 is our first masonry saw equipped with our patented water management system. The water use is minimized by a unique distribution which keeps the work piece dry and the workplace clean. The optional adjustable stand enables one person to move MS 360 around the jobsite. The optional stand also makes it easy to position the saw in various heights or collas it with one hand. With the quick and easy set up you will get more cutting done. This masonry saw is ideal to use for pavers, bricks, stone and concrete block. Delivered with VARI-CUT™ Turbo blade.

MINIMIZE USE OF WATER

Patented water management system can be manually optimized for perfection and keep the cut in the work piece dry.

EXCEPTIONAL CUTTING DEPTH

5" cutting depth for standard 14" blade.

CLEAN WORK SPACE

Keeps water and slurry in the cart, not on the tile face like traditional saws, so there is little slurry to wipe off after cutting.

EASY TRANSPORT

Quick and easy set-up and breakdown mean more time cutting on the job.
